## SUMMARY
Sophomore computer science student at Texas A&M University, seeking professional experience in software engineering as a summer intern. Interested in intuitive software development and computer science solutions. Exceptional technical knowledge and customer service experience, as well as leadership experience within student organizations.

## EDUCATION
**Texas A&M University,** College Station, Texas                                          Fall 2017—Spring 2021
*B.S., Computer Science*, Minor in Cyber Security                                                         GPA 3.4

## WORK EXPERIENCE
**Plus One Robotics**, San Antonio, Texas
*Software Engineer Intern*                                                          June 2019 – August 2019
- Gain experience in the field of software engineering and computer vision/AI
- Work closely with other employees to test and develop new software for industrial robotics solutions
- Develop unit tests for computer vision software in a timely manner
- Take initiative with regard to bug fixing, and independently fix a handful of software bugs

**Texas A&M Help Desk Central**, College Station, Texas
*Student Technician*                                                                  Mar 2018 – Mar 2019
- Gain experience in the field of information technology and technical support
- Work closely with other technicians and develop solid problem-solving and troubleshooting skills
- Develop my personable service skills and communication skills unrelated to food-service.

## LEADERSHIP EXPERIENCE & ORGANIZATIONS
**Breakaway Ministries**, College Station, Texas
*Media Team Leader*                                                                  Jan 2018 – Present
- Lead a focused and driven team to put on a large-scale production weekly
- Work with and know how to operate and troubleshoot high production value equipment
- Assist with the setup and teardown of large stage and sound equipment

## PERSONAL PROJECTS
**Tiny Hero** – A 3D platforming video game where you complete a set of levels to save the princess.       June 2018
**Tic Tac Toe (C++)** – A command line implementation of tic tac toe with full documentation on Github.   February 2019
**Personal Website** – My personal website (made with Node.js and React) at collinscribner.com           May 2019
